PROFESSIONAL SUMMARY

Developed projects using Python, SQL, Machine Learning, and Linux, with practical experience in data analysis and processing. Built a content-based Movie Recommendation System with 5,000+ movies and a Linux Data Processing Pipeline using Python, Pandas, and Bash. Skilled in data cleaning, analysis, and visualization, with a strong interest in solving real-world data problems.

Education

MCA – Data Science Specialization

Lovely Professionals University

2025 – 2027

(Currently Pursuing)

BCA – Computer Application

Raj School of Management Science Varanasi (7.2 CGPA)

2023 – 2025

EXPERIENCE

SEO/SMO Intern: Lake Ayurveda | Noida

June 2026 - September 2026

- Optimized website content, Meta tags, and keyword placement, resulting in 20% improvement in organic search visibility.
- Monitored website traffic and performance using Google Search Console and Google Analytics 4, identifying key trends that informed 12-15% increase in organic traffic / decision-making.
- Managed social media posting and content scheduling across platforms, increasing engagement/followers by 15-20%.

PROJECTS

Linux Data Cleaning Automation Pipeline | [Link](#)

08/2026 – 10/2026

Linux | Bash | Python | Pandas | Jupyter Notebook | Git | GitHub

- Built an automated data cleaning pipeline using Linux/WSL, Bash, Python, and Pandas to process the Titanic dataset.
- Automated missing-value handling, data validation, and cleaned CSV generation from the raw dataset.
- Added error handling and execution logging to make the pipeline reliable and easy to track.

Customer Sales Analytics & Prediction Platform | [Link](#)

05/2026 – 07/2027

Python | SQL | Pandas | NumPy | Matplotlib | Power BI | Scikit-learn | Machine Learning | AI

- Analyzed customer and sales data using SQL, Python, and Pandas to identify trends and key metrics.
- Built an interactive Power BI dashboard to track sales, revenue, customer segments, and KPIs.
- Developed a Machine Learning model to predict customer outcomes and generate business insights.

SKILLS

Programming: Python, SQL, Bash

Data Analysis: Pandas, NumPy, Excel

Visualization: Matplotlib, Seaborn, Power BI

Machine Learning: Scikit-learn, Regression, Classification

Development & Tools: FastAPI, Linux, Git, GitHub, Jupyter Notebook

CERTIFICATIONS

Data Science Course (Code With Harry)

04/2025 – 10/2025

- Covered Python, NumPy, Pandas, Matplotlib, Seaborn, SQL, and Machine Learning fundamentals.
